

SUMIT PANDE

Full Stack Engineer • Backend Specialist

pande.sumit122@gmail.com | +91 94213 34481 | Pune, India

Portfolio | LinkedIn | GitHub

SUMMARY

Full Stack Engineer with **3.8 years** specializing in backend systems, distributed architecture, and internal platform engineering. Known for owning greenfield products end-to-end — from schema design to production deployment — and for building shared infrastructure that accelerates team delivery. Strong in system design, event-driven architecture, and translating complex requirements into maintainable, scalable systems.

EXPERIENCE

Dassault Systèmes

July 2022 - Present

Software Engineering Specialist

Pune, India

- **Led end-to-end development of Skill Portal** — a greenfield enterprise platform now used by 1000+ employees, comprising four integrated modules: ProG, RMG Dashboard, My Competency, and Team Competency.
- **Engineered ProG**, a PDF profile generation system adopted org-wide, **cutting profile creation time by 80%** and saving estimated 200+ hours/month.
- **Built RMG Dashboard** for resource managers to access employee profiles on demand, **improving request turnaround by 50%**.
- **Shipped LLM-powered query engine** integrating Ollama with Node.js for intent detection and dynamic function dispatch — enabling natural language interaction with internal tools without custom model training.
- **Architected and published internal NPM utility library** adopted across 5+ projects, **reducing cross-team code duplication by 40%** — now a core dependency across all Skill Portal modules.
- **Technically led a 3-engineer pod** for the Compare-Tool module, owning task breakdown, code reviews, and delivery timelines.

PROJECTS

Nexus | Link

React.js, Node.js, TypeScript, PostgreSQL, Redis, Socket.io, Kafka, Docker

- **Designed a horizontally scalable WebSocket messaging system** supporting direct and group conversations using Redis Pub/Sub adapter for distributed real-time event fan-out.
- **Extended with a Notification Microservice** consuming Kafka events and routing to email and in-app channels based on user preferences, with delivery tracking and dead-letter retry logic.
- **Secured auth** with JWT access tokens and HTTP-only refresh tokens, implementing rotation and reuse-detection backed by Redis.
- **Modeled a normalized relational schema** with composite indexes and cursor-based pagination, optimizing PostgreSQL queries performance for high-throughput message reads.

SKILLS

Backend: Node.js, Java, Python, TypeScript, REST APIs, Microservices, Distributed Systems, System Design

Frontend: JavaScript, HTML, CSS, React.js, Next.js, Vue.js, Zustand

Databases: PostgreSQL, MongoDB, Redis (Pub/Sub, caching), GraphQL, Prisma, Database Design

Messaging: Kafka, Event-Driven Architecture, Pub/Sub, CI/CD

Tools: Docker, Git, GitHub, NPM (package publishing), AWS (EC2, S3), VS Code

EDUCATION

Shri Guru Gobind Singhji Institute of Engineering and Technology

Nanded, Maharashtra

B.Tech in Information Technology

Mar 2018 - Mar 2022

CGPA: 8.6

CERTIFICATIONS

- CS50W: CS50's Web Programming with Python and JavaScript — **edX**
